## Monthly Commentary

March delivered a strong return for the fund as markets dealt with multiple themes that are developing. The Russian invasion of Ukraine continues in all its horror, but the risk of nuclear intervention appears to have diminished and brought the focus back to conventional but protracted warfare. Europe is impacted by its geographical proximity, as well as by the continent's heavy reliance on Russia to meet its oil and gas needs. The attention of governments and markets has therefore turned to energy security, pragmatically looking at which countries are suitable long-term partners and onshoring production of key commodities and products. Investors have also had to confront rising inflation rates, rising bond yields and hawkish comments from central bankers (although they have been careful about converting talk into action). This has driven a flight to quality, with the US dollar and commodity currencies, like the Canadian and Australian dollar, rising. With investors selling bonds, money has found its way into equity markets as an inflation hedge, and a place to hide from fixed income losses. Strong gains were made in fertiliser stocks, with Mosaic +28.2%, in lithium, as thoughts turn to electric cars, with Lithium Americas + 36.6%, and in solar energy and hydrogen, with Enphase +22.3% and Plug +14.4% (all figures in euro). It is also worth noting that gold miners are delivering gains, either as an inflation backstop, or more likely as a hedge against an economic slowdown/recession. Please look at a long-term chart of the HUI index to see the potential for the sector if the current trend continues.

## Risk and return profile

### Risk and return profile

This risk indicator is designed to illustrate the fund's risk/return profile. The higher the rating on the scale, the greater the earnings potential, but also the more significant the risk of suffering a loss. This risk indicator is based on historical data and therefore cannot predict future performance. The rating may change in future and does not represent a guarantee. A category 1 rating also does not represent a completely risk-free investment. The unit class is rated as category 6, because the unit class price has demonstrated high levels of variation in the past.

The following risk categories may be of significant importance and are not adequately encompassed in the risk indicator:

**Liquidity risks:** Where a significant level of investment is made in financial instruments, which by their nature are sufficiently liquid, but which under certain circumstances can have a relatively low level of liquidity, this may have an impact on the level of liquidity of the sub-fund as a whole.

**Default risk:** The fund transacts business with several counterparties. If a counterparty becomes insolvent, the fund's outstanding debts may not be paid or may only be partially paid.

**Operational risks and risks relating to the custody of assets:** The fund may fall victim to fraud and/or other criminal activities. It may incur losses due to external events, insufficient internal processes, system failures or human error on the part of the management company, depositary/subdepository or external third parties.

**Credit risks:** The sub-fund invests directly or indirectly in bonds / convertible bonds. If the issuer of a bond / convertible bond does not pay interest on time or does not repay the nominal amount, the bond / convertible bond may suffer a significant or total loss of value. A downgrading of the issuer's credit rating may also cause the bond / convertible bond to suffer a significant or total loss of value.

**Emerging market risk:** The sub-fund invests in emerging markets (less developed markets) which are generally associated with a higher level of political, regulatory and legal risk. Increased economic uncertainty, lower liquidity, a higher rate of inflation and lower total capitalisation are also to be expected.

This fund has its domicile in Luxembourg and could be further registered for public offering in other countries. Further information on public offering in the individual countries can be found, if available under the relevant fund law, in the prospectus or constituent documents, the investor information and the key investor information (KIID). Due to different registration proceedings, no guarantee can be given that the fund and – if applicable – sub-funds are or will be registered in every jurisdiction and at the same time. Please note, that in any country where a fund is not registered for public offering, distribution - in accordance with local regulations - can only take place as a "private placement" or to institutional investors. Shares in funds are not offered for sale in countries where such sale is prohibited by law.

This fund is not registered under the United States Securities Act of 1933. Fund units must therefore not be offered or sold in the United States neither for or on account of US persons (in the context of the definitions for the purposes of US federal laws on securities, goods and taxes, including Regulation S in relation to the United States Securities Act of 1933). Subsequent unit transfers in the United States and/or to US persons are not permitted. Any documents related to this fund must not be circulated in the United States.

If the subfund is authorised for public distribution outside its domicile, all fund documents may be obtained free of charge from the Representative or the Information Agent in German and/or English and, where applicable, in the languages of the regions in which the Fund is registered. If there is no Representative or Information Agent in a country, the fund documents may be obtained from the Paying Agent. Where the national provisions do not require a Paying Agent, a Representative or an information agent for the distribution of foreign funds, all fund documents may be obtained at the Payment Agent, Representative, the Custodian and all authorised distributors domestically and abroad.
