Monthly Commentary

February was an extraordinary month for markets, and the fund delivered strongly, extending its run of gains to ten consecutive months. Bond yields declined and global equities advanced, supported by resilient economic data. However, technology shares, particularly in the software sector, were weaker amid concerns over potential disruption from artificial intelligence. Commodities were in demand after gold reached an all-time high of \$5,595/oz, before closing the month at \$5,234.69/oz, a 7.93% month-on-month gain. The subsequent pullback followed the appointment of Kevin Warsh as the next Federal Reserve Chair, a development interpreted by markets as signalling that interest-rate cuts are not guaranteed. Oil prices rose as geopolitical tensions intensified, with Iran in focus and markets assessing the risk of disruptions to energy supplies. Alternative energy equities trod water as investors favoured oil and gas producers over transition-related stocks. Nonetheless, the fragility of hydrocarbon energy supply has underscored the importance of alternative energy, and there are encouraging signs of renewed activity in the sector, with share prices advancing from a low base. Silver was notably volatile as markets digested physical supply constraints, Chinese demand, and strong speculative flows. After January’s breakout above \$53, the metal closed February at \$93.64/oz, up 9.76% month-on-month. Unsurprisingly, precious-metal miners benefited from record profits and expanding margins, delivering a sector gain of 23,5% in February (in euro). Copper also experienced volatility, trading within a range of \$6.11 to \$5,56, but still posting a modest gain of 1.35%. Notably, Freeport-McMoRan, the key copper producer, continued to face production challenges and reduced its output estimates. Meanwhile, other mining companies have been acquiring producing copper assets in anticipation of tightening supply. Lundin Mining, a leading copper holding in the fund, reported strong results and rose 26.3% during the month (in euro). The resource cycle is again in focus, and we think there is further potential ahead.

Investment Objectives & Sustainability (ESG)

The „SUNARES Natural Resources New Era Fund“ is an actively managed fund that invests in companies driving the global transition to an advanced and resource-efficient economy. The fund’s portfolio includes equity investments in natural resources and focuses on key metals and commodities that form the foundations and building blocks of an evolving economy. Gold and silver mines are an important sector because, along with other commodities, they represent real value in both inflationary and deflationary times and are expected to provide long-term stability. The fund also invests in advanced and alternative energy production methods, the latest agricultural technologies, and innovative water solutions that promote the efficient use of the world’s limited vital resources. Furthermore, the fund aims to invest in key sectors of the digital economy and advanced health and medical technologies to capitalize on the opportunities presented by new trends in these sectors.

SUNARES is a fund with environmental and/or social characteristics (Art. 8 Regulation (EU) 2019/2088, Disclosure Regulation)

Risk and return profile

Risk Indicator:

The risk indicator assumes you keep the product until 6 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high. This rates the potential losses from future performance at a medium-high level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment. For further information and performance scenarios, please refer to the Key Information Document.
