 Automatic termination of the PRIIPS: no

Objectives: This is a sub-fund with environmental and/or social characteristics (Art. 8 Regulation (EU) 2019/2088, Disclosure Regulation). SUNARES - Natural Resources New Era Fund is an actively managed fund that invests in companies that drive the global transition to an advanced and resource efficient economy. The fund's portfolio includes equity investments in natural resources and focuses on key metals and commodities that form the foundations and building blocks of an evolving economy. Gold and silver mines are an important sector because, along with other commodities, they represent real value in both inflationary and deflationary times and are intended to provide long-term stability. The fund also invests in advanced and alternative energy production methods, the latest agricultural technologies, and innovative water solutions that promote the efficient use of the world's limited vital resources. Furthermore, the fund aims to invest in key sectors of the digital economy and advanced health and medical technologies to capitalize on the opportunities presented by new trends in these sectors.

Intended retail investor: In the member state of origin, the product is intended for professional and private investors with a long-term investment horizon, basic experience and who are able to bear a full financial loss. The product may be used for capital appreciation and the generation of an additional income.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product until 6 years.
 The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund are not able to pay you.
 We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.
 This product does not include any protection from future market performance so you could lose some or all of your investment.

Key Information Document

Performance-Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 11 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. This type of unfavorable scenario occurred for an investment between January 2023 and January 2024 (if you exit after 1 year), April 2019 and April 2025 (if you exit after 6 years). This type of moderate scenario occurred for an investment between July 2024 and July 2025 (if you exit after 1 year), June 2017 and June 2023 (if you exit after 6 years). This type of favorable scenario occurred for an investment between February 2025 and February 2026 (if you exit after 1 year), March 2016 and March 2022 (if you exit after 6 years).

Recommended holding period: 6 years Example Investment: 10'000 EUR		If you exit after 1 year	If you exit after 6 years
Worst case scenario	You could lose some or all of your investment		
Stress scenario	What you might get back after costs	2'890 EUR	1'580 EUR
	Average return each year	-71.1 % p.a.	-26.5 % p.a.
Unfavourable scenario	What you might get back after costs	6'640 EUR	8'940 EUR
	Average return each year	-33.6 % p.a.	-1.9 % p.a.
Moderate scenario	What you might get back after costs	10'230 EUR	13'140 EUR
	Average return each year	2.3 % p.a.	4.7 % p.a.
Favourable scenario	What you might get back after costs	21'850 EUR	21'280 EUR
	Average return each year	118.5 % p.a.	13.5 % p.a.

The calculations of previous performance scenarios can be found under www.vpfundsolutions.com.

What happens if VP Fund Solutions (Luxembourg) SA is unable to pay out?

Should the manufacturer, VP Fund Solutions (Luxembourg) SA, or the depositary bank, default on their obligations, the product is not included in the insolvent estate, and may be transferred or liquidated in compliance with the legal requirements.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10'000 EUR Investment.

	If you exit after 1 year	If you exit after 6 years
Total costs	853 EUR	3'727 EUR
Annual cost impact (*)	8.6 %	4.7 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.5 % before costs and 3.9 % after costs.

Key Information Document

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.0 % of the amount you pay in when entering this investment. The impact of the costs you pay when entering into your investment. The maximum costs are indicated, you could pay less. The distribution costs are included.	500 EUR
Exit costs	0.0 % of your investment before it is paid out to you. The impact of the costs of exiting your investment when it matures.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	3.2 % of the value of your investment per year. The impact of the costs we annually deduct to manage your investment.	320 EUR
Transaction costs	0.6 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	60 EUR
Incidental costs taken under specific conditions		
Performance fees and carried interest	0.0 % of the value of your investment per year. There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

Based on the risk/return profile, we recommend a holding period of at least 6 year(s) for this product. However, you can return the product to the manufacturer at the next NAV subject to the notice period specified in the fund documents. Early redemption may have a significant impact on the risk/return profile. The AIFM or the management company may, provided this is taken into account in the constitutive documents, use appropriate liquidity management tools ("LMTs").

How can I complain?

To file a complaint about the product or about the conduct of the PRIIP manufacturer or the person advising on, or selling the product, please contact: VP Fund Solutions (Luxembourg) SA, "Complaints Officer", 2540 Luxemburg, Luxembourg, www.vpfundsolutions.com, CFI.Luxembourg@vpbank.com

Other relevant information

This chart shows the fund's performance as the percentage loss or gain per year over the last 10 years.

Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past

Performance is shown after deduction of ongoing charges. Any entry and exit charges are excluded from the calculation.

The share class shown has been launched on 14. February 2008.

The historical performance was calculated in EUR.
